- Status of test cases executed
- Deflects found & their status
- Suggestions for next period of testing

TEST CASE EXECUTION STATUS

This is the status of all the test cases that are run on the Web Application

Test Case Status	Build Result
Total Number of Test Case	35
Passed Test Case	15
Failed Test Case	20
Blocked / Skipped Test Case	0

DEFECTS STATUS

This table lists the number of defects in the based on their priority

Defect Status	Build Result
Total number	20
Blocker	18
Critical	0
Major	0
Minor	2

This table lists the number of defects in the based on their type

Defect Status	Build Result
Total number	20
Functional	6
UI/UX	14
Performance	0
Compatibility	0

Suggestions for improvement

- ☐ The Register functionality is not working fine, it is accepting invalid email-id and telephone number, the developer must have to fix this on priority basis
- ☐ The login functionality is not working fine, the user is able to login with the invalid registered email-id.
- ☐ The main barrier I found while testing the login functionality is when the user logs in and logs out more than 3 times and then tries to log in again a message is displayed - Warning! You are exceeding the login limit please try after 1 hour.
- ☐ The forgot password functionality is not working fine after clicking on forgot password and giving valid already registered email-id, I didn't receive any mail for resetting my password, this issue is blocking the user to proceed further
- ☐ The search textfield is not working at all, when I type a keyword computer it is displaying a message - There are no products to list in this category.
- ☐ Product results page is not developed properly, it should be developed again
- ☐ Many products are not listed in the given categories.
- ☐ Users are not able to buy the products when the user clicks on checkout option a message is displayed on the same page - Products marked with *** are not available in the desired quantity or not in stock! Which blocks the use completely this issue will affect the business workflow of the user and customer both.
- ☐ The TutorialsNinja website is very unstable, the developers need to develop it again.
